THE AMERICAN PRESIDENCY

The American Presidency is a thorough and interesting review of the people who have held the office from George Washington to Barack Obama. Each presidential profile includes a detailed biography, the president's signature, who served as vice president, a profile of the first lady, and timelines. Other information describes the Presidential Election Process, Cabinet, White House, election results, the presidential flag, and the presidential seal history. With over 175 images, 43 timelines, and 33 world events maps, *The American Presidency* provides a rich journey through U.S. history.

EARTH'S CHANGING ENVIRONMENT

Give your students, librarians, and teachers accurate and reliable information on climate change with *Earth's Changing Environment*. Written for ages 10 to 17, this comprehensive look at the environment focuses on climate, greenhouse effect, global warming, and the Kyoto Protocol while exploring the delicate web of life with articles on ecology, biogeography, biodiversity, endangered species, deforestation, and desertification. The effects of environmental pollution and efforts to protect the environment and to conserve its resources are also addressed.

NEW VIEWS OF THE SOLAR SYSTEM

Is your library up to date on the Solar System? When the International Astronomical Union redefined the term "planet," Pluto was stripped of its designation as the solar system's ninth planet. *New Views of the Solar System* looks at scientists' changing perspectives on the solar system, with articles on Pluto, the eight chief planets, and dwarf planets. Brilliant photos and drawings showcase the planets, asteroids, comets, and more, providing a stunning collection of vivid and detailed images of the solar system.
