

Eventually, your students will become responsible for themselves and need to exchange time and skills for an income—a livelihood endeavor. Teaching them to choose a career that fosters joy, honors core values, and justly rewards efforts is an important goal.

When and how do you begin the career-choice process?

Spark curiosity and promote valuable literacy skills in beginning and reluctant PreK-3 readers with these all new STEM series from Bellwether:

- **Coding Is Everywhere**  
Our lives are filled with computers! We use them to work, play games, learn, and even drive our cars and heat our homes! At the heart of each of these computers is millions of lines of code telling them what to do. But how does that code work? This series introduces young readers to the power of code and how it impacts our daily lives.
- **Everyday Engineering**  
Engineers design structures that take our breath away. But how do these structures work? From towering skyscrapers to high-speed roller coasters, this series introduces young readers to some of the the greatest feats of engineering. Explore the different types of each structures and learn about the science that makes them possible!
- **Science Starters**  
Where does light come from? How do magnets work? This series illuminates some of the scientific wonders of our world, from the unseen forces of gravity and magnetism to the awesome power of electricity. Young students will love getting to the bottom of these everyday mysteries, and even get to test their knowledge with a topic-specific experiment!
