The Organization

Decodables by Jump! begins with the very basics of phonetically decodable reading. Starting with the earliest step of CVC words (consonant, vowel, consonant) and building on this combination slowly, the reader follows a perscribed format supported by the science of reading. This systematic and sequential approach supports most phonics programs.

Color Band Levels

Decodables by Jump! is organized by level and color bands, providing a consistent and structured approach that helps guide and support reading instruction. As the reader moves through the color band levels, the level of repetition and sentence structure complexity all advance at a rate which encourages development and reading confidence.
